Maintenance

1.1 Measure Structure

Single Measure

1.3 Electronic Clinical Quality Measure (eCQM)

No

1.6 Measure Description

The Young Adult Health Care Survey (YAHCS) is a survey of adolescents 14-18 years of age that assesses how well the health care system provides adolescents with recommended preventive care. The YAHCS assesses the provision of private and confidential care, experience of care, helpfulness of care provided, and the following aspects of preventive care:

- Preventive screening and counseling on risky behaviors.
- Preventive screening and counseling on sexual activity and sexually transmitted diseases (STDs).
- Preventive screening and counseling on weight, healthy diet, and exercise.
- Preventive screening and counseling on emotional health and relationship issues.

- Private and confidential care.
- Helpfulness of counseling.
- Communication and experience of care.
- Health information.

The YAHCS has been used to assess health care quality at the national, State, geographic, county, and health plan levels. English and Spanish versions of the YAHCS are available free of charge on CAHMI's web site (<http://www.cahmi.org>), and additional information is available at the Child Healthcare Quality Toolbox: www.ahrq.gov/chtoolbox/measure7.htm

Please contact CAHMI staff at cahmi@ohsu.edu for more information.

1.7 Measure Type

Outcome

1.8 Level of Analysis

Health Plan, Other, Population: Community, County or City, Population: Regional and State

1.9 Care Setting

Ambulatory Care: Clinician Office

1.20 Types of Data Sources

Instrument-Based Data

6.1.2 Current or Planned Use(s)

Public Reporting, Quality Improvement (Internal to the specific organization), Quality Improvement with Benchmarking (external benchmarking to multiple organizations)

6.1.3 Current Use(s)

Public Reporting, Quality Improvement (Internal to the specific organization), Quality Improvement with Benchmarking (external benchmarking to multiple organizations)

Planned Use

Public Reporting, Quality Improvement (Internal to the specific organization), Quality Improvement with Benchmarking (external benchmarking to multiple organizations)

Risk Adjustment

No risk adjustment or risk stratification

Target Population

Children
