Title

Correlation With Existing Imaging Studies for All Patients Undergoing Bone Scintigraphy

Project

Care Coordination

Endorsement Status

Endorsement Removed

Is Under Review

No

Previous Endorsement Cycle

Full Year 2011

Removal Date

Wed, 08/01/2012 - 20:00

Initial Endorsement

Mon, 10/27/2008 - 20:00

Steward

Physician Consortium for Performance Improvement

1.0 New or Maintenance

Maintenance

1.1 Measure Structure

Single Measure

1.3 Electronic Clinical Quality Measure (eCQM)

No

1.6 Measure Description

Percentage of final reports for all patients, regardless of age, undergoing bone scintigraphy that include physician documentation of correlation with existing relevant imaging studies (eg, x-ray, MRI, CT) that were performed

1.7 Measure Type

Process

1.8 Level of Analysis

Clinician: Group/Practice, Clinician: Individual

1.9 Care Setting

Other, Outpatient Services

1.14 Numerator

Final reports that include physician documentation of correlation with existing relevant* imaging studies (eg, x-ray, MRI, CT) Definition: *Relevant imaging studies are defined as studies that correspond to the same anatomical region in question.

1.15 Denominator

All final reports for patients, regardless of age, undergoing bone scintigraphyNote: Correlative studies are considered to be unavailable if relevant studies (reports and/or actual examination material)from other imaging modalities exist but could not be obtained after reasonable efforts to retrieve the studies are made by the interpreting physician prior to the finalization of the bone scintigraphy report.

1.20 Types of Data Sources

Claims Data, Electronic Health Data, Other, Paper Records, Registry data

6.1.2 Current or Planned Use(s)

Public Reporting, Quality Improvement (Internal to the specific organization)

6.1.3 Current Use(s)

Public Reporting, Quality Improvement (Internal to the specific organization)

Exclusions

System reason for not documenting correlation with existing relevant imaging studies in final report (eg, no existing relevant imaging study available, patient did not have a previous relevant imaging study)

Risk Adjustment

No risk adjustment or risk stratification

Target Population

Elderly
