1.0 New or Maintenance

Maintenance

1.1 Measure Structure

Single Measure

1.3 Electronic Clinical Quality Measure (eCQM)

No

1.6 Measure Description

Percentage of short term home health episodes of care during which pain interventions were included in the physician-ordered plan of care and implemented.

1.7 Measure Type

Process

1.8 Level of Analysis

Facility

1.9 Care Setting

Home Care

1.14 Numerator

Number of home health episodes of care during which pain interventions were included in the physician-ordered plan of care and implemented.

1.15 Denominator

Number of home health episodes of care ending during the reporting period, other than those covered by generic or measure-specific exclusions.

1.20 Types of Data Sources

Electronic Health Records: Electronic Health Records

6.1.2 Current or Planned Use(s)

Public Reporting, Quality Improvement with Benchmarking (external benchmarking to multiple organizations)

6.1.3 Current Use(s)

Public Reporting, Quality Improvement with Benchmarking (external benchmarking to multiple organizations)

Exclusions

Episodes in which the patient did not have pain since the last OASIS assessment, as evidenced by a formal assessment that indicated no pain. Long-term episodes (as indicated by the presence of a follow-up assessment between admission and transfer or discharge). Episodes ending in patient death.

Risk Adjustment

No risk adjustment or risk stratification

Target Population

Elderly
