**1.1 Measure Structure**

Single Measure

**1.3 Electronic Clinical Quality Measure (eCQM)**

No

**1.6 Measure Description**

This measure reports the percentage of long-stay residents in a nursing home who have experienced one or more falls resulting in major injury (defined as bone fractures, joint dislocations, closed head injuries with altered consciousness, or subdural hematoma) reported in the look-back period no more than 275 days prior to the target assessment. The long stay nursing home population is defined as residents who have received 101 or more cumulative days of nursing home care by the end of the target assessment period. This measure is based on data obtained through the Minimum Data Set (MDS) 3.0 OBRA, PPS, and/or discharge assessments during the selected quarter(s).

## 1.8 Level of Analysis

Facility

### 1.13 Data Dictionary

Not attached. I attest that all information will be provided where codes and/or value sets are needed (1.14a - 1.15c).

### 1.14 Numerator

The numerator is the number of long-stay residents with one or more look-back scan assessments that indicate one or more falls that resulted in major injury.

### 1.15 Denominator

The denominator consists of all long-stay nursing home residents with one or more look-back scan assessments except those who meet the exclusion criteria.

## 6.1.2 Current or Planned Use(s)

Public Reporting, Quality Improvement with Benchmarking (external benchmarking to multiple organizations), Quality Improvement (Internal to the specific organization)

## 6.1.3 Current Use(s)

Public Reporting, Quality Improvement with Benchmarking (external benchmarking to multiple organizations), Quality Improvement (Internal to the specific organization)

## Exclusions

A resident is excluded from the denominator of this quality measure if all look-back scan assessments indicate that data is missing from the data element assessing falls resulting in major injury during the look-back period preceding the target assessment.

## Measure Disclaimer

n/a

## Risk Adjustment

No risk adjustment or risk stratification

## Target Population

Elderly, Individuals with multiple chronic conditions, Populations at Risk

## Use In Federal Program

Inpatient Rehabilitation Facility Quality Reporting, Long-Term Care Hospital Quality Reporting, Skilled Nursing Facility Quality Reporting
