1.0 New or Maintenance

New

1.6 Measure Description

Risk-adjusted ratio of observed bacteremias and fungemias to predicted bacteremias and fungemias among patients previously admitted to acute care hospitals.

1.7 Measure Type

Outcome

1.13 Data Dictionary

Not attached. I attest that all information will be provided where codes and/or value sets are needed (1.14a - 1.15c).

1.14 Numerator

Observed bacteremia and fungemia among patients previously admitted to acute care hospitals.

1.15 Denominator

The HOB measure denominator is the predicted number of HOB events in an acute care hospital based on predictive models using facility-level and patient-level factors.
